## **Model DM 3000P Whole House HEPA Filter From Fantech Improves Indoor Air Quality And Increases Customer Satisfaction!**

Installation is a breeze – so jobs get done on time!

Model DM 3000P is remarkably easy to install, vertically or horizontally, on existing ductwork of forced air furnaces or air handlers. It can also be used as an independent system mounted in the attic, a crawl space or a closet.

High-quality performance will have happy customers telling their friends!

Whole House HEPA Filtration will clean the total volume of air in an average house once each hour, and it's 99.97% effective at removing particles down to 0.3 microns including dust, pet dander, mold, tobacco and cooking smoke.

An important step to improve indoor air quality – customers will appreciate you letting them know!

Indoor air pollutants can be up to five times greater than outdoor pollutants. Model DM 3000P is great for homes with infants and elderly who spend a lot of time indoors.
