Electro Industries

Electro-Mate® Plenum Heaters Will Heat Up Your Profits!

The Electro-Mate® zero-clearance electric conversion system from Electro Industries converts an existing natural gas, LP or oil furnace into a “dual-fuel” (electric/gas-oil) system. This can save your customers hundreds of dollars on heating bills each year!

Easy Installation For Great Profits!

The Electro-Mate® simply inserts into the plenum above or below the existing furnace. Plus, all thermostat control wiring is simplified and handled within the Electro-Mate®. Jobs go quick and get done right.

No Need For New Air Handling Equipment – It’s An Easy Sell!

The Electro-Mate® uses the existing blower to distribute the air throughout the home, saving the need for new air handling equipment and making conversions even more attractive for customers.

The Flexibility To Work In Virtually Any Home!

With models ranging from 34,000 to 68,000 Btu/h, the Electro-Mate® can meet most home heating needs.

Suggest an Electro-Mate® to your customers, and let DSG turn up the temp on your bottom line!
