

# DSG

**DAKOTA SUPPLY GROUP**  
*For all the right connections!*

**Prevent customer complaints, reduce lost revenue and avoid increased costs due to higher line losses.**

Here's why DSG customers ask for VR-1 platform- and pole-mounted voltage regulators from GE by name!

- **Long-lasting Quality!**  
Expected switch life up to two million operations! That means your regulator could provide 20 years of maintenance-free service!
- **The Flexibility For Any Job!**  
GE provides two control types (VR-1 & SM3) with different function levels to match customer applications.
- **User Friendly!**  
The sealed-tank, cover-suspended design allows the removal of the complete interior from the top for easy maintenance.
- **Easy To Program!**  
The SM3 control can be programmed either from the panel or through a standard RS-232 nine-pin connector from a laptop PC using GE Smart Monitor<sup>®</sup> software.

**Improve service with VR-1 voltage regulators from DSG!**
