AMERICAN AVK COMPANY

Secure Your Hydrants with AVK TamperGuard!

Every hydrant should have a new AVK hydrant lock! Here's why:

- **Prevents unauthorized operation of your hydrants!**
It's a highly effective way to secure your hydrants against tampering, vandalism and water theft, and can easily be removed by fire departments in emergency situations.
- **Durable construction provides heavy-duty protection!**
The AVK hydrant lock assembly is constructed entirely of stainless steel with a brass lock. It will not corrode or show signs of weathering – and it will always work when you want it to.
- **Easy retrofits on existing hydrants make installation a snap!**
Installation is quick and easy and requires no modifications to your AVK hydrants. Simple-to-follow instructions are supplied with each lock kit.

**Protect your hydrants from vandals with AVK
TamperGuard. Call DSG today!**
