For all the right connections!

Telemecanique

Altivar® 21 Variable Speed Drives From Telemecanique® Are Easy To Install, So You Can Do It All!

An economical choice!

Reduces installation costs by eliminating throttling valves or inlet guide vanes typically used to control flow. Also saves time with quick installation and wiring.

Simple installation and operation!

Parameters are factory configured for immediate start-up. It features pump and fan micro-configurations for easy and quick commissioning, and also includes local controls for testing and troubleshooting.

Compact footprint!

Small size and side-by-side mounting require less panel space.

Easy integration into building management systems!

Internally mounted option cards connect to LonWorks®, BACnet, MetaSYS® N2 and APOGEE™ P1 FLN networks. Complies with international standards and certifications including CE, UL®, CSA® and C-Tick.
