For all the right connections!

## TWB Secondary Connectors (W-bars) For Padmount Transformers Improve Connections While Reducing Physical Stress.

**ELASTIMOLD®**

- True compact design enables jobs to run smoothly with minimal maintenance!
  - More surface area dispenses more efficient heat dissipation so it runs cooler.
  - Provides more finger room for easier conductor handling.
  - Neutralizes and balances torsional stresses on studs so there's no loosening of stud connections.
  - Halves cantilever stress.
- Superior screws last longer!

Aluminum set screws with 5/16" socket hex spread compressive forces over conductor strands, reduce strand damage and increase inter-strand movement. Screws also provide high set screw torque retention.
- Stud connections eliminate difficulties for easy installation!

Patented, ALL-IN-ONE-Fit, single stud hole design provides flexibility and economy for installation on either 5/8"-11 or 1"-14 studs. Quick disconnect option (D-type) allows easy installation and removal without removing cable.

Call DSG today to get your hands on the long-lasting performance of TWB secondary connectors from Elastimold® – **NOW IN STOCK!**
