Improve Customer Service And Resolve Billing Issues With The Orion® Data Profile Transmitter From Badger Meter.®

Stores meter readings 24 hours a day, seven days a week.

Review meter readings for any time or date, past or present, to get accurate water usage measurements. It's ideal for addressing billing complaints and customer service issues.

Software that does the work for you.

It allows you to access the meter reading data you want using either the Orion® Premium Laptop Kit or the Badger® Radix® Data Collector, and easily tabulates the information for you.

Built-in leak detection that helps you and your customers feel safe.

If water does not stop running for one hour in a 24-hour period, the potential leak alarm notifies the meter reader that the account may have a potential leak. Now, you can inform your customers about possible leaks, saving money and wasted water.

Call DSG today and find out what the Orion® Data Profile Transmitter can do for you!

Go online to
